

ROUND RIPPLE

Water gives life; we shape its movement into art

ROUND RIPPLE is defined by a smooth round glass body with a strong circular outline. At its center, the surface draws inward, creating a layered ripple pattern that feels like water gently moving within the form.

The glass captures light through its curved surface, revealing depth, softness, and quiet reflection. Suspended in space, ROUND RIPPLE feels calm and sculptural — a round glass form shaped by flowing ripples and natural movement.
